CYGNUS FMD SYSTEM KEY FEATURES

The FMD system comprises three fundamental parts:

VERSATILE

The FMD system is both diver or ROV deployable. Being of a compact design the probe is able to get into to hard to reach areas (e.g. K nodes) where other inspection working methods cannot. A range of versatile options to suit working depths and varying requirements are available:

REPORTING SOFTWARE

SUBSEA UNIT

PROBE AND PROBE HANDLER

SUBSEA UNIT
LIGHTWEIGHT ACETAL

CABLE PROTECTOR
PROVIDES EXTRA CABLE PROTECTION AND AN ATTACHMENT POINT FOR DIVERS

SELF ALIGNING PROBE HANDLER
LIGHTWEIGHT ACETAL

SYSTEM TEST TANK
USED TO RUN A FULL SYSTEM TEST OF THE FMD SYSTEM

UMBILICAL CABLE 120M LENGTH OR 350M LENGTH

COST EFFECTIVE

The Cygnus FMD System is owner operated and extremely easy to learn and understand. Due to its simplicity of use, the FMD system can be used by a range of operators, with varying experience, without the need for external contractors.

EASY TO USE

The Cygnus FMD has an innovative probe handling solution which self aligns, ensuring correct contact with the member, even when approached from an angle.

The system also has a contact sensor which will not allow a test to be taken unless the probe is correctly aligned.

The system returns a simple DRY / FLOODED result to the reporting software with results logged at the surface.

RUGGED

Available in high grade acetal for the harshest environments. The FMD equipment is designed to the highest standards, supported by a three year warranty.

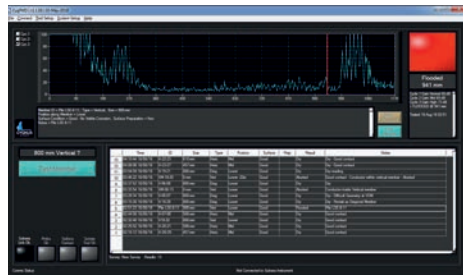

RELIABLE

Cygnus is an ultrasonic specialist. Years of industry experience and design expertise combine to make this system an extremely advanced, effective and reliable Ultrasonic FMD System available.

- The purpose-designed system boasts:
 - advanced signal processing
 - an advanced peak detection algorithm
 - low distortion / low noise data acquisition to ensure highest level of confidence and to eliminate false readings.
- The system will only take a measurement when the contact sensor detects probe contact, ensuring reliable results every time. The reporting software will indicate at the surface should the probe lose contact during a test.
- System Test Function ensures the reliability of the system before it is deployed.

FMD REPORTING SOFTWARE

- Used to perform system tests
- Displays test results
- Displays A-Scans for verification
- Indicator shows RED if flooded, GREEN if dry
- Logs results for offline analysis
- Reports can be generated and exported to PDF and Excel
